Boiler - Propane/NG Annual Service Plan

Comfort Plan Includes

ANNUAL TUNE-UP & EFFICIENCY TEST

Based on our records, 4 out of 5 system breakdowns could have been prevented with annual maintenance. A tune-up also keeps your boiler running efficiently, reduces your energy bills and increases the longevity of your system.

REPAIR PROTECTION

Repairs to your existing system will be **discounted 20%** during regular business hours and at night.

EMERGENCY SERVICE

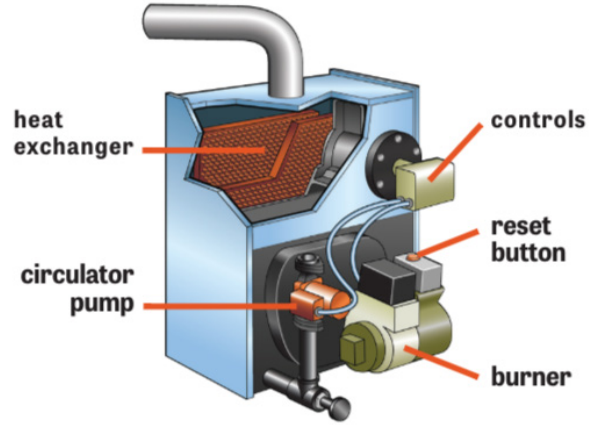
With our 24-hour emergency service*, no matter what the season, a service technician will come to your home.

*All plans subject to availability and qualification. See terms and conditions.

ANNUAL TUNE-UP & EFFICIENCY TEST

13-Point Inspection includes the following steps:

1. Replace fuel filter
2. Flush tank valve
3. Check and clean retention heads
4. Test and adjust air band
5. Replace pump screen and gasket
6. Inspect smoke pipe
7. Test system efficiency
8. Inspect chimney base
9. Inspect cracks or failing tile
10. Flush low water cut offs
11. Brush and vacuum heat exchanger
12. Check fuel line for leaks
13. Replace fuel burner nozzle



Why a Service Plan?

1. Regular Maintenance

Regular servicing and maintenance helps your boiler run efficiently and extends the life of your system, which can save money long-term.

2. Breakdown Coverage

Our contract includes coverage for breakdowns, ensuring you're not hit with unexpected repair costs, especially during an emergency.

3. Priority Service

If your boiler breaks down during peak seasons, you will receive priority service over non-contract customers.

4. Cost Efficiency

You can save money with an annual plan. The added fuel efficiency from your annual tune up will pay for the service plan itself!

5. Convenience

Our service contract includes schedule reminders for maintenance visits, so you don't have to remember to call.

6. Warranty Compliance

Many boiler manufactures require regular professional maintenance to keep warranties valid.

7. Peace of Mind

Knowing your system is regularly maintained and inspected reduces the risk of unexpected breakdowns.
